Course Description:

This course is intended to provide an overview of the U.S. StormPro Shelter market, and the regulatory requirements for impact-protective systems as defined by ICC 500 (Standard for the Design and Construction of Storm Shelters).

The course covers performance requirements as determined by the relative building codes as adopted by each state, as well as addressing the importance of properly tested and listed systems used throughout a storm shelter design.

Additionally, we will discuss ASSA ABLOY product applications in Windstorm, StormPro, and Hurricane as it relates to the Texas Department of Insurance (TDI) and Florida Building Code (FBC).

Meet with our expert David Stammen, Director of Windstorm Opening Solutions, ASSA ABLOY. David is a 30 year industry expert in the Fenestration/Building Envelope Industry.
